

Exemples cURL DR-DOCSCOL

Derniere mise a jour: 02/06/2026.

Ces exemples servent de base. Les routes protegees utilisent la session Supabase stockee en cookies dans l'application; pour les tester avec cURL, recuperer les cookies de session ou passer par l'interface.

Health

```
`bash
curl http://localhost:3000/api/health
`
```

Auth

Login admin DECC

```
`bash
curl -X POST http://localhost:3000/api/auth/login \
-H "Content-Type: application/json" \
-d '{
  "matricule": "DECC-01-ADAMAOUA",
  "email": "admin.decc.adamaoua@example.com",
  "password": "DeccAdamaoua2026!",
  "loginOrganisme": "DECC"
}'
`
```

Login admin OBC

```
`bash
curl -X POST http://localhost:3000/api/auth/login \
-H "Content-Type: application/json" \
-d '{
  "matricule": "ADM-02-CENTRE",
  "email": "admin.centre@example.com",
  "password": "AdminCentre2026!",
  "loginOrganisme": "OBC"
}'
`
```

Demande reset password

```
`bash
curl -X POST http://localhost:3000/api/auth/password/forgot \
-H "Content-Type: application/json" \
-d '{"email": "eleve@example.com"}'
`
```

Eleve

Liste des documents

```
`bash
curl http://localhost:3000/api/students/me/documents \
  -H "Cookie: YOUR_SUPABASE_COOKIE_HEADER"
```

Instructions de retrait

```
`bash
curl http://localhost:3000/api/students/me/documents/DOCUMENT_ID/instructions \
  -H "Cookie: YOUR_SUPABASE_COOKIE_HEADER"
```

Prendre rendez-vous

```
`bash
curl -X POST http://localhost:3000/api/students/me/documents/DOCUMENT_ID/appointments \
  -H "Cookie: YOUR_SUPABASE_COOKIE_HEADER" \
  -H "Content-Type: application/json" \
  -d '{
    "dateRdv": "2026-06-05",
    "heureRdv": "08:00-10:00",
    "commentaire": "Reservation eleve"
  }'
```

Export calendrier

```
`bash
curl -X POST http://localhost:3000/api/students/me/documents/DOCUMENT_ID/calendar-event \
  -H "Cookie: YOUR_SUPABASE_COOKIE_HEADER" \
  --output rendez-vous.ics
```

Annuler un paiement en attente

```
`bash
curl -X PATCH http://localhost:3000/api/students/me/payments/PAYMENT_ID/cancel \
  -H "Cookie: YOUR_SUPABASE_COOKIE_HEADER"
```

Voir un reçu

```
`bash
curl http://localhost:3000/api/students/me/payments/PAYMENT_ID/receipt \
  -H "Cookie: YOUR_SUPABASE_COOKIE_HEADER"
```

Admin

Documents admin

```
`bash
curl http://localhost:3000/api/admin/documents \
  -H "Cookie: YOUR_SUPABASE_COOKIE_HEADER"
`
```

Changer statut document

```
`bash
curl -X PATCH http://localhost:3000/api/admin/documents/DOCUMENT_ID/status \
  -H "Cookie: YOUR_SUPABASE_COOKIE_HEADER" \
  -H "Content-Type: application/json" \
  -d '{"statut":"DISPONIBLE"}'
`
```

Paielements admin

```
`bash
curl http://localhost:3000/api/admin/payments \
  -H "Cookie: YOUR_SUPABASE_COOKIE_HEADER"
`
```

Audit logs

```
`bash
curl http://localhost:3000/api/admin/audit-logs \
  -H "Cookie: YOUR_SUPABASE_COOKIE_HEADER"
`
```

Retrait physique admin

```
`bash
curl -X POST http://localhost:3000/api/admin/withdrawals \
  -H "Cookie: YOUR_SUPABASE_COOKIE_HEADER" \
  -H "Content-Type: application/json" \
  -d '{
    "documentId": "DOCUMENT_ID",
    "commentaire": "Retrait confirme au guichet"
  }'
`
```

Agent centre d'examen

Liste des rendez-vous

```
`bash
curl "http://localhost:3000/api/centre-examen/appointments?filter=today" \
  -H "Cookie: YOUR_SUPABASE_COOKIE_HEADER"
`
```

Confirmer retrait

```
`bash
curl -X PATCH http://localhost:3000/api/centre-examen/appointments/APPOINTMENT_ID/
confirm-withdrawal \
-H "Cookie: YOUR_SUPABASE_COOKIE_HEADER"
```

Routes internes

Rappel 30 jours

```
`bash
curl -X POST http://localhost:3000/api/internal/notifications/reminder-30days \
-H "Authorization: Bearer YOUR_INTERNAL_SECRET"
```

Webhook paiement

```
`bash
curl -X POST http://localhost:3000/api/payments/webhook \
-H "Authorization: Bearer YOUR_INTERNAL_SECRET" \
-H "Content-Type: application/json" \
-d '{
  "paymentId": "PAYMENT_ID",
  "statut": "EFFECTUE",
  "numeroRecu": "REC-TEST-001",
  "montant": 10000,
  "commentaire": "Paiement de test"
}'
```

Diagnostic DB

```
`bash
set -a; source .env; set +a
psql "$DATABASE_URL" -c 'select now();'
```

Si ce test timeout, corriger la connexion Postgres avant de tester les routes protegees.
